

An important issue for today’s financial professions is the implementation of Artificial Intelligence into their daily lives. For this issue, Gundi Jeffrey interviewed the MNP LLP about their progress to date. And Jaydeep Shah offers up a penetrating explanation of AI and its relationship with RPA. Also, Ed Hall provides a practical example of an AI based system being used to negotiate debt settlements. But that isn’t all we have for you. Check out our Fall 2021 issue of *ThinkTWENTY20* for penetrating insights on how to upskill yourself to meet the challenges of the future; take a deep dive into cryptocurrencies; and get a peek inside the future of corporate reporting. It’s all here, in our Fall issue.

The Commonality between Automation and AI – A Perspective

By Jaideep Shah

“Automation” is something that we hear about all the time and we don’t even bat an eyelid. But, when we hear “Artificial Intelligence” (AI), it turns heads. The interesting thing is that the two concepts have a lot in common.

How AI Is Transforming the Accounting Profession

By Gundi Jeffrey, Managing Editor

ThinkTWENTY20 talked to MNP about AI for our first issue more than two years ago. Since then, AI has taken over a lot more work that accountants used to do, and is being used in new and innovative ways.

Remove the Brakes to Unlock Your True Potential

By David Wray, ACA, CPA, CGA

The last two-years have turbo-charged the profession’s change through technology, geopolitics, climate change and, of course, the global pandemic. These forces are leading to the need for new and more innovative skills.

Applying Artificial Intelligence in the Real World

By Edward Hall, CPA

An innovative approach to settling debt disputes through the use of AI. (Sponsored Content)

A Brief Primer on Cryptocurrencies and Keys: How Evolving Payment Trends Influence the Management of Cryptocurrencies in Business

By Eric E. Cohen, CPA

While most organizations are still trying to adapt to the long-standing but challenging world of login names and passwords for security and access, cryptocurrencies exacerbate the issue with new mechanisms and a new vocabulary.

Purpose, Accountability and Value Creation: Paradigm Shifts in the Future of Corporate Reporting

By Alan Willis, FCPA, FCA

We are at an inflection point in corporate reporting. Significant phenomena are occurring concurrently that are having unprecedented influence on the future of corporate reporting: convergence among proliferating standards and guidelines for meeting user information needs in the ESG reporting space

Book Review: Value(s): Building a Better World for All

By Jonathan Andrews, CPA

In Value(s): Building a Better World for All, Mark Carney explores the relationship between “value” in an economic sense and “values” in a moral sense.
